CONTENTS

Special Issue: Calorimetry in the Biological Sciences

Preface ix

Whole-body Calorimetry

Whole-body calorimetry in man and animals
M.J. Dauncey (Cambridge, UK) 1

A novel 1 liter flow-through calorimeter for heat production measurements on aquatic animals without stress
A.D.F. Addink, G. van den Thillart, H. Smit and J. van Waversveld (Leiden, The Netherlands) 41

Calorimetry of newborn infants: techniques and applications
P.J.J. Sauer and H.K.A. Visser (Rotterdam, The Netherlands) 49

Heat loss and thermoregulation in a nest of the bumblebee *Bombus lapidarius* (Hymenoptera, Apidae)
P. Schultze-Motel (Berlin, Germany) 57

Plants

Plant calorimetry: how to quantitatively compare apples and oranges
R.S. Criddle and R.W. Breidenbach (Davis, CA, USA) and L.D. Hansen (Provo, UT, USA) . 67

Analysis of heat production in a thermogenic arum lily, *Philodendron selloum*, by three calorimetric methods
R.S. Seymour (Adelaide, S.A., Australia) 91

DSC, DTA, and TG of cellulose untreated and treated with flame-retardants
T. Hirata (Ibaraki, Japan) and T. Nishimoto (Nagoya, Japan) 99

Ecology

Calorimetry in ecology
U. Reh (Berlin, Germany) 107

Calorimetric investigations of pollution by xenobiotics
K. Drong, I. Lamprecht, Ch. Motzkus and B. Schaarschmidt (Berlin, Germany) 125

On-line estimation of biological oxygen demand using direct calorimetry on surface attached microbial cultures
P. Weppen and B.G. Müller (Brunswick, Germany), J. Ebens and D. Schuller (Oldenburg, Germany) 135

Micro-organisms

Microbiological calorimetry
L. Gustafsson (Gothenberg, Sweden) 145

In vitro energy conversion of sugars and sugar substitutes by rat caecal flora
D. Krüger and R. Grossklaus (Berlin, Germany) 173

A bioassay of pollutants from animal house air by batch microcalorimetry
J. Hartung (Hannover, Germany) 183

Influence of Pharmaca

Pharmaceutical calorimetry: a selective review
G. Buckton (London, UK), S.J. Russell and A.E. Beezer (Canterbury, Kent, UK) 195

Megacalorimetry

Large-scale calorimetry and biotechnology
U. von Stockar and I.W. Marison (Lausanne, Switzerland) 215

Bench-scale calorimetry in biotechnology
B. Zentgraf (Leipzig, Germany) 243

Tissue and Tissue Cultures
Calorimetric studies of heat flux in animal cells
R.B. Kemp (Aberystwyth, Dyfed, UK) 253
The contribution of the sodium pump to the basal metabolism of isolated cardiac muscle: a calorimetric study
J. Daut and T. Groß (Munich, Germany) and G. Elzinga (Amsterdam, The Netherlands) ... 269
Calorimetric studies of lymphocytes and hybridoma cells
M. Monti (Lund, Sweden) 281
Flow microcalorimetry for human erythrocyte hemolysis induced by ionic drug binding
M. Yamamoto and H. Aki (Fukuoka, Japan) 287

Membranes
Biological calorimetry: membranes
A. Blume (Kaiserslautern, Germany) 299

Enzymatic Systems
Thermodynamics of enzymes in unusual environments
G. Rialdi (Genoa, Italy), E. Battistel (Novara, Italy) and B.G. Barisas (Fort Collins, CO, USA) 349

Proteins and Nucleic Acids
Proteins in aqueous solutions. Calorimetric studies and thermodynamic characterization
G. Castronuovo (Naples, Italy) 363
Conformational changes in nucleic acids/chromatin structure
H.H. Klump, J. Völker, D.L. Maeder and C.H.M. Sobolewski (Rondebosch, South Africa) and Th. Niermann (Basel, Switzerland) 391

Food and Food Technology
Thermal behaviour of foods
A. Raemy and P. Lambelet (Lausanne, Switzerland) 417
DSC studies of starch in cereal and cereal products
K. Münzing (Detmold, Germany) 441

Author Index 449

Subject Index 451
